## Profile

Results-driven Web Developer with a strong foundation in full-stack development, dedicated to delivering innovative, high-performance solutions centered on optimizing user experience.

## Education

**Bachelor in Computer Science** 2018 - 2023  
Universidad Rafael Belloso Chacin, Maracaibo, Venezuela

## Employment

**OTT Application Developer (Desarrollador de Aplicaciones OTT) en Velope Inc.** Sep 2024 - Feb 2026  
[Velope Inc.](#)

**Velope** is an engineering firm specializing in the development of platforms for connected televisions and multimedia devices. Our solutions address the constraints of your entire technological ecosystem and leverage cutting-edge development techniques to deliver a dynamic and engaging user experience.

As an **OTT Developer** at Velope, I am in charge of developing OTT applications for our diverse client portfolio, utilizing a variety of languages and technologies. My work primarily consists of using **TypeScript** and the **Lightning framework** to develop scalable and maintainable OTT applications that can run across a wide range of TV devices and browsers.

**Full-stack Developer** Feb 2024 - Sep 2024  
[Carbones del Zulia, S.A. \(CARBOZULIA\)](#)

I served as an Application Management and Programming Analyst, developing the web applications required by the company to optimize all internal and external processes.

**Full-stack Developer** Sep 2023 - Jan 2024  
[kayratech](#)

As a **Full Stack Developer**, I designed and developed end-to-end web applications using modern technologies to boost the company's operational efficiency. My primary focus was the seamless integration of backend systems with frontend interfaces, delivering cohesive, functional, and high-performance digital solutions that significantly optimize the user experience.

**Full-stack Developer** Aug 2023 - Nov 2023  
[jardin el guacamayo](#)

As a **Full Stack Developer**, I led the end-to-end development of an e-commerce platform, designing and implementing both the user interface for product sales and an **advanced admin dashboard** for user management, inventory, categories, and marketing strategies (coupons and discounts). I architected a **robust Web API** integrated with a **NoSQL database** for efficient request handling and data scalability, finalizing the project with a successful **VPS deployment** under **SSL security protocols** to ensure platform integrity.
